

Aung Kaung Myat Paing

Web Developer

EDUCATION

University of the people / Computer Science

PRESENT

I pursued a Computer Science major at the University of the People through online studies.

SKILLS & COMPETENCIES

Technical Skills

- **Laravel:** In-depth knowledge of Laravel 9+ framework, including MVC architecture, Eloquent ORM, Blade templating engine, routing, middleware, migrations, and unit testing.
- **PHP:** Strong command of object-oriented PHP programming principles, SOLID principles, and best practices.
- **SQL:** Hands-on experience with SQL schema design, MySQL, data modeling, database optimization, and query optimization techniques.
- **RESTful APIs:** Designing and implementing secure and efficient RESTful APIs for data interfacing.
- **Frontend Technologies:** Experienced with React and NextJs.

Soft Skills

- **Problem-solving:** Demonstrates a creative and efficient mindset when addressing technical challenges, adept at analyzing intricate requirements, and proficient in devising solutions that align with project objectives.
- **Communication:** Exhibits excellent written and verbal communication skills, fostering effective collaboration with UX teams, project managers, and fellow developers.
- **Documentation:** Possesses the ability to articulate code, architecture, and processes in a clear and concise manner, ensuring comprehensive documentation.
- **Teamwork:** Engages in a collaborative approach, fostering a spirit of teamwork and effectively contributing to the collective knowledge while supporting colleagues.
- **Proactiveness:** Displays self-motivation and results-oriented behavior, coupled with a keen enthusiasm for learning new technologies and staying abreast of industry best practices.

SKILL OVERVIEW

- **Programming Languages**
PHP, JavaScript
- **Frameworks**
Laravel, NextJS, ReactJS

Laravel Specific

- **Advanced Eloquent ORM Mastery:** Proficient in leveraging Eloquent ORM features such as eager loading, lazy loading, defining relationships, utilizing model scopes, and implementing custom accessor and mutators for efficient and expressive database interactions.
- **Laravel Caching Strategies:** Adept at implementing various caching strategies, including database caching, file caching, and Redis caching, to optimize application performance and response times.
- **Queueing and Job Processing Proficiency:** Experienced in utilizing Laravel Queues and Laravel Horizon to manage asynchronous tasks and background processing, ensuring smooth execution of time-consuming operations.
- **Event Broadcasting and Listening:** Skilled in utilizing Laravel's event system to build real-time applications, enabling seamless communication for notifications and data updates.
- **Authorization and Authentication Expert:** Capable of implementing diverse authentication strategies, such as JWT and Session-based authentication, along with adept knowledge of access control mechanisms like Role-Based Access Control and Attribute-Based Access Control.
- **Repository Pattern Implementation:** Proficient in implementing the repository pattern to achieve data access abstraction and maintain a clear separation of concerns within the application structure.
- **Service Layer Pattern Development:** Experienced in building reusable services to handle complex business logic, facilitating the decoupling of controllers from intricate business processes for enhanced maintainability.
- **Observer Pattern Utilization:** Skilled in employing the observer pattern for effective event handling and notifications, enhancing the application's responsiveness and adaptability to changes.

Next JS

- **Server-Side Rendering (SSR):** Competent in implementing Server-Side Rendering using Next.js, enhancing performance and optimizing initial page loads for a seamless user experience.
- **Client-Side Routing:** Proficient in leveraging Next.js for client-side routing, ensuring smooth and efficient navigation within the web application.
- **Static Site Generation (SSG):** Experienced in utilizing Next.js for Static Site Generation, enabling the generation of pre-rendered static pages for improved performance and search engine optimization.
- **API Routes and Middleware:** Skilled in creating API routes and implementing middleware with Next.js, facilitating seamless communication between the front-end and back-end components.
- **Dynamic Content Rendering:** Adept at dynamically rendering content with Next.js, allowing for the creation of dynamic and interactive web applications.
- **Data Fetching Strategies:** Knowledgeable in employing various data fetching strategies, including static data fetching at build time, server-side data fetching, and client-side data fetching, to optimize application performance.
- **Styling and Theming:** Proficient in implementing styling and theming strategies with Next.js, utilizing CSS modules, styled-components, or other styling solutions to enhance the visual appeal and maintainability of the application.
- **Middleware Integration:** Skilled in integrating middleware functions with Next.js, allowing for customization and enhancement of the request and response handling process.
- **Authentication Implementation:** Capable of implementing authentication mechanisms within a Next.js application, ensuring secure and seamless user interactions.
- **Error Handling and Logging:** Experienced in implementing effective error handling mechanisms and logging strategies to identify and address issues within the Next.js application for improved reliability and maintainability.

WORK EXPERIENCE

Iconic Digital Branding Solution — Mid Web Developer

1 YEAR , 6th Quarter, South Okkalapa Township

Iconic is my first job in a software company, and I gained a lot of experience in web development. I developed 5 projects and maintained 2 projects.

Freelance Developer

1 YEAR - BEFORE ICONIC

Before my software company job, I had embarked on a freelance developer journey, collaborating with my senior developers on various projects. I developed 4 projects as my solo freelancer journey.

App.com.mm — Backend Developer

1st March 2024 - PRESENT, No. 85, Moe Thauk Pan Street, Su Paung Housing Htu Par Yone 1st Ward, Tharkayta Township

App.com.mm is a software company, and I gained a lot of experience in web development as remote (WFH)

Par Ta Nar Digital Marketing Agency — Web Developer (Collaborator)

collaborator with Par Ta Nar

Par Ta Nar is a digital marketing agency, and I work as a web developer collaboration team
